PROFILE

I am currently studying Software Engineering at Aptech and have already learned HTML, CSS, and JavaScript. I am now working on improving my PHP skills as part of my ongoing diploma. Along with my studies, I have done some small freelance projects like creating basic websites and front-end designs for local clients. These experiences have helped me understand how to work with real clients and build practical skills.

WORK EXPERIENCE

- Remote** 3 MONTHS
 - Freelance Web Developer

Developed 4+ responsive websites for local clients using HTML, CSS, and JavaScript.

Customized WordPress themes for small business websites and blogs.

Created user-friendly interfaces and mobile-friendly layouts.

Integrated contact forms, basic animations, and optimized website speed.

Worked closely with clients to understand their needs and deliver on time.
- Remote Internship** 3 MONTHS
 - In Inside Developer
 - Assisted in front-end development tasks using HTML, CSS, and WordPress.
 - Designed and developed 2 responsive websites from scratch, ensuring cross-browser compatibility.
 - Collaborated remotely with the team, gaining experience in professional communication and project management.
 - Improved website layouts and user experience by applying modern design practices.
